## **System and Network Administrator, Rollout Enginner, Tech Support**

Hello.

I'm an System and Network Administrator. I have 4 years of experience in OS Administration in my country.

In my last job I've worked as System and Network Administrator, I Managed all the IT Infrastructure (workstation/server/switches/.../) of an Educational institution.

Installed and Configured Windows 2000 Professional and configured them to run in a Restricted User environment using Regedit and User Permission, Securing the OS, NTFS/Group Policy/Regedit permissions, Antivirus/Firewall, made a LAN on my own (switches/cables/connectors).

Made a Proxy Server on a Linux machine with statistics to monitor the usage of the server and to restrict access to unauthorised web sites.

Day-to-day system maintenance, Trouble shooting, problem solving, administration and support of Windows 2000.

I vave good knowledge in Windows 2000/Xp Security (Firewall, Group Policy, User/NTFS Permissions, etc.), Worked with all Windows Based System 95/98/2k/Xp/Vista + Linux.

Experience in recovering/backup/restoring windows based systems, Technical Support/Security/Problem Solving.

Experience in managing a LAN (TCP/IP),

Linux User, Installed RedHat/Fedora (console/linux text) and Configured as a Proxy Server + Statistics (Squid + Sarg).

Vast experience in solving all kind of Windows problems/errors.

I used programs like: Acronis True Image, Dameware NT Utilites, Zone Alarm Firewall, Symantec Antivirus Corporate Edition / Endpoint Protection and many others...

Please contact me if you require any further information.

On request I can send my CV.
